	LT-S300: .300 Win. Mag.
	LT-SWSM: .270, .300, .325 WSM

The in-the-chamber design of the LT-223 allows the user to realistically train anywhere and practice tap, rack, bang or malfunction drills in the comfort of one's own home.

The LT-223 fits inside the cartridge chamber and features a firing-pin activated switch that indicates bullet impact with a bright red laser dot. A built-in snap cap protects the firing pin and O-rings hold the laser accurately in place allowing for repeated dry fire practice without compromising accuracy. The rim-less cartridge trainer also allows for constant racking without unintentional ejection.

The LT-223 Training Cartridge is LaserLyte® Trainer Target compatible. Incorporating the LaserLyte® TLB-1 system into any training practice provides the user with an interactive, low-cost training tool for unsighted fire, accuracy, grouping and trigger control.

The LaserLyte® LT-223 is the foundation training cartridge for an array of new Training Cartridge Sleeves for many popular hunting calibers. The LaserLyte® Training Cartridges in the new rifle calibers give young and first-time shooters the opportunity to practice the fundamentals, as well as, refine trigger control skills for shooters of all levels. The rimmed sleeves are made of solid brass and work perfectly in all bolt-action rifles. The LT-223, in combination with any of the new Training Cartridge Sleeves and the LaserLyte® Trainer Target, can improve the success of any hunt or target shoot with realistic, anytime-anyplace, affordable training.

recycled paper

.223 REM RIFLE TRAINER CARTRIDGE LASER

- Revitalize your dry-fire training
- Brief laser dot shines when dry-firing
- Trainer fits in chamber for realistic training
- Integrated laser and snap-cap
- Train anywhere and save ammo

.223 REM RIFLE TRAINER CARTRIDGE LASER

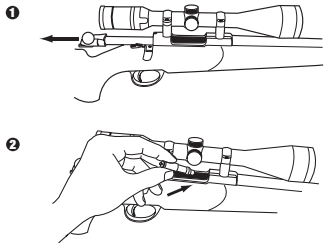

LT-223

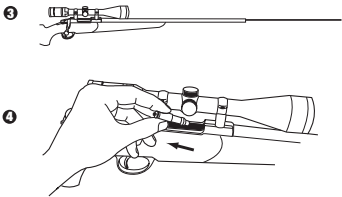

.223 REM RIFLE TRAINER CARTRIDGE

- 1 UNLOAD YOUR FIREARM! ALWAYS POINT IN A SAFE DIRECTION
- 2 Insert laser into the chamber of the firearm.

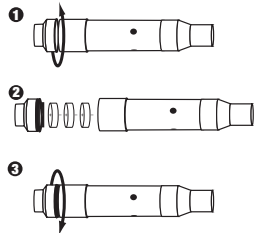

- Ready your rifle and pull trigger to fire red laser dot.
- Use a cleaning rod to gently push the cartridge out.

Changing Batteries

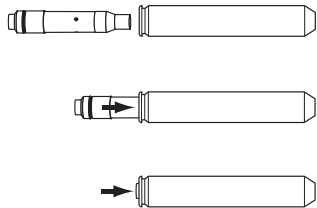

The LT takes three 377 batteries

- 1 Unscrew the back of the laser located near the rim of the cartridge.
 - 2 Take out old batteries and insert new batteries with positive (+) facing out.
- Screw the cap back on all the way.

Use with Sleeves

Insert the .223 laser trainer into the additional caliber sleeves.

WARRANTY:
Three Year
Limited Warranty.

LASER TRAINING

NOW AVAILABLE FOR YOUR RIFLE

EFFICIENT RIFLE TRAINING

Take the excuses out of your rifle training schedule with the Rifle Trainer Cartridge.

EXPANDING ON THE GROUND-BREAKING PISTOL LASER TRAINER CARTRIDGES, LASERLYTE® BRINGS THE SAME TRAINING EFFICIENCY TO THE RIFLE PLATFORM. THE RIMLESS, FIRING-PIN ACTIVATED LASER TRAINER WORKS WITH OR WITHOUT OUR LASER TRAINER TARGETS. THE IN-CHAMBER DESIGN ALLOWS MALFUNCTION DRILLS AND RACKING MOVEMENTS WITHOUT UNINTENTIONAL EJECTING. THE RIFLE LASER TRAINER FROM LASERLYTE® IS SURE TO SAVE YOU TIME AND MONEY, AND WITH PROPER PRACTICE, MAKE YOU A BETTER SHOOTER ON YOUR NEXT RANGE DAY, GAME DAY OR HUNT.
